The Metaverse - a rich, persistent, interactive experience featuring co-creation and fully functioning shared economies - is rapidly emerging and gaining mainstream adoption

The Metaverse is already here

An always-on digital environment, the Metaverse promises to transform the way users attend meetings, socialize, shop, play games, take classes, enjoy cultural experiences, and more

The building blocks of the Metaverse are taking shape, starting to coalesce, and will transform nearly every environment that enterprises currently do business across

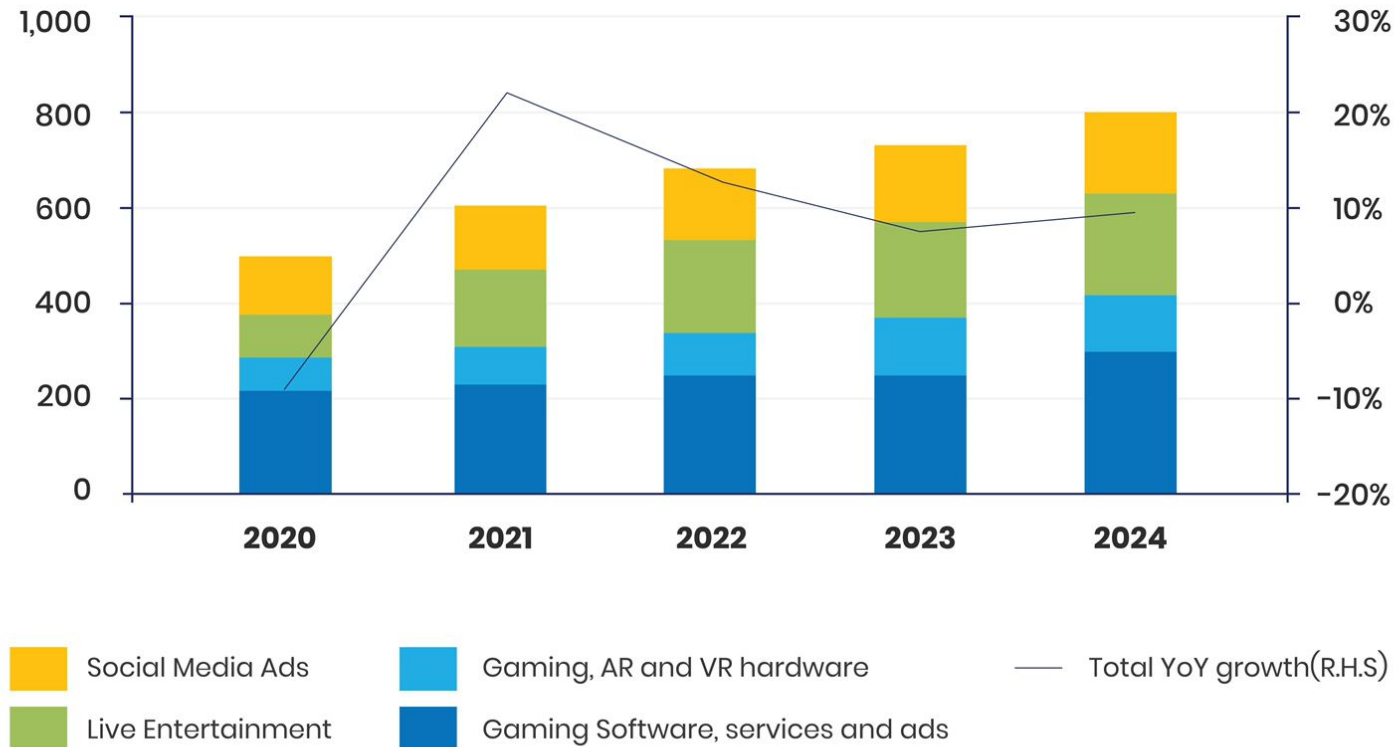

Gartner expects that by 2026, 25% of people will spend at least one hour a day in the Metaverse for work, shopping, education, social media and/or entertainment

Source: Gartner

According to Bloomberg Intelligence, the global **Metaverse opportunity** could reach \$800 billion in 2024 and result in a multi-trillion opportunity by 2030

The Metaverse Growth, 2020-2024

Separately, Citi analysts believe the total addressable market for the Metaverse could be between \$8 trillion and \$13 trillion by 2030, serving as many as 5 billion users. This will require a secure, robust, and scalable decentralized financial ecosystem underlining it

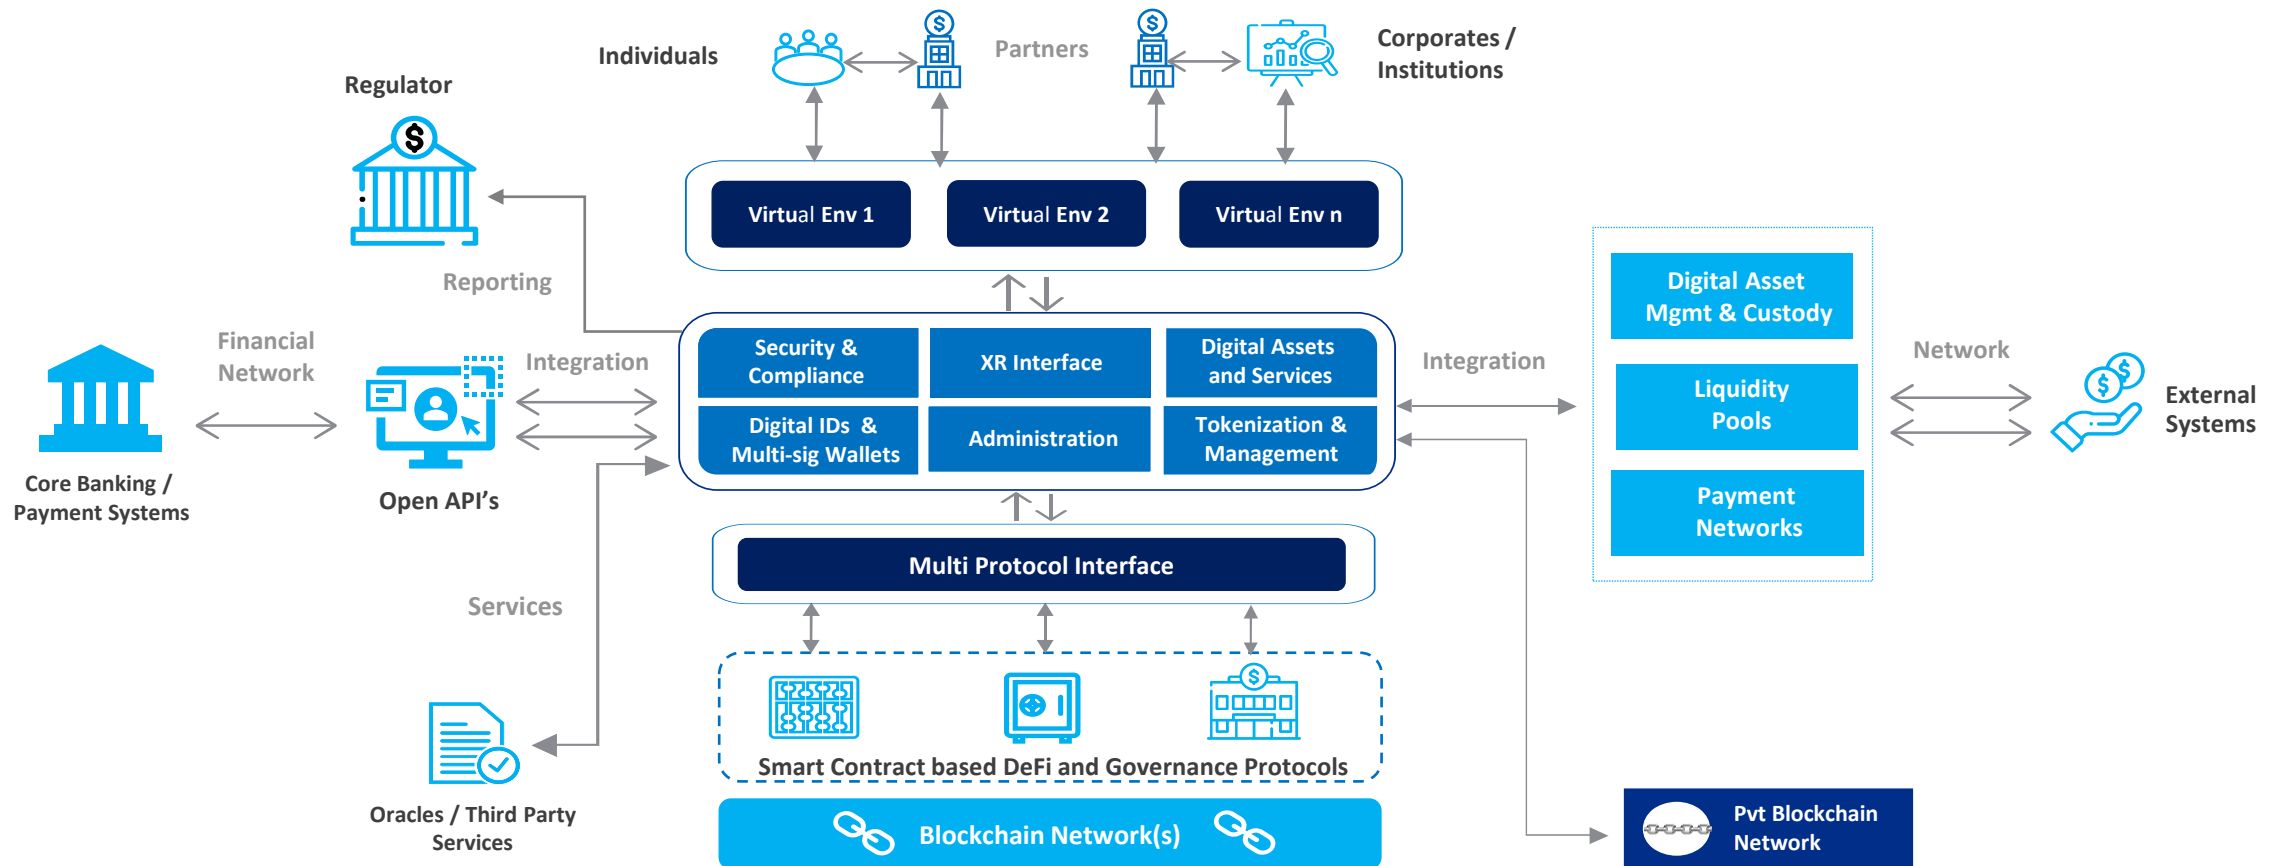

Ledger Banker blends leading DeFi practices and emerging Web3 technologies with existing financial systems to enable next-gen Digital Banking for the Metaverse era

Powered by a Gen-3 Blockchain, the platform securely wraps a set of DeFi and governance protocols and integrates with legacy financial apps to deliver a host of financial products and services in the Metaverse

The Blockchain-based platform enables the tokenization of traditional financial products and the creation of all-new token-based digital finance offerings primed for the Metaverse

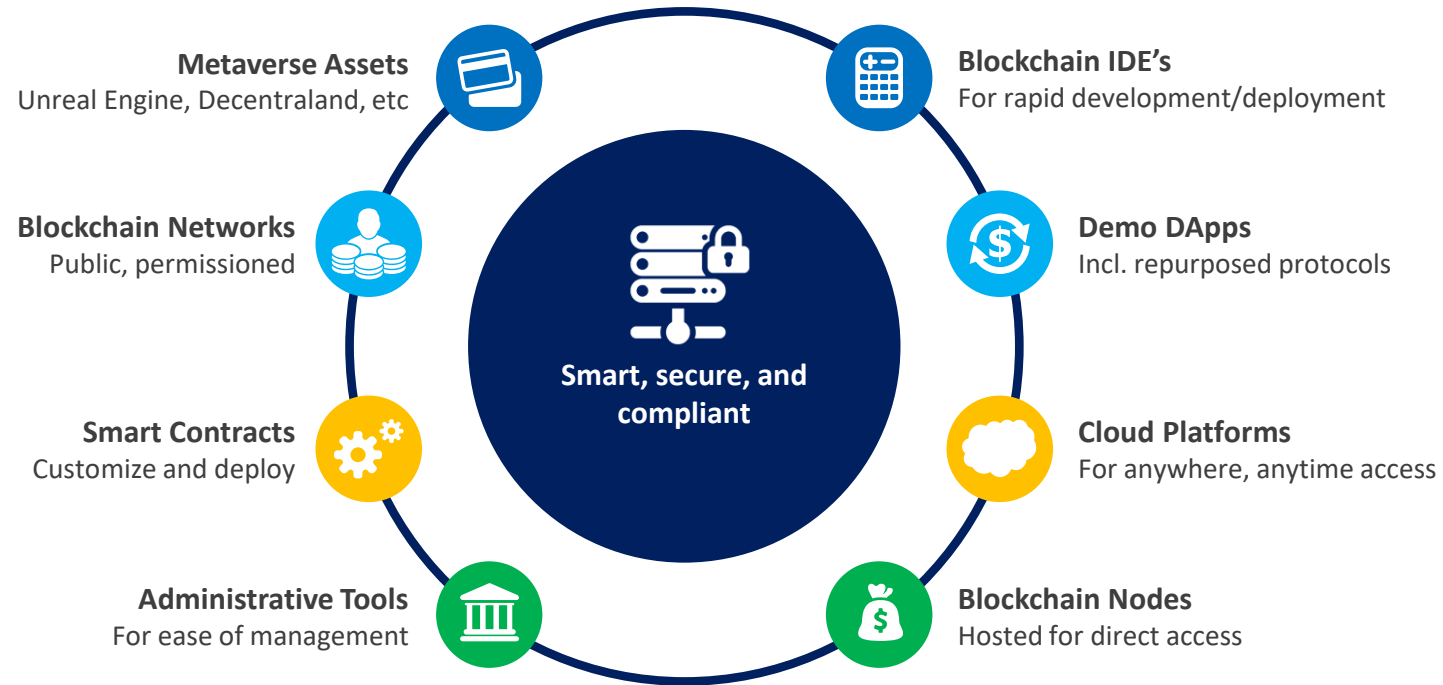

How it all comes together

Zero Trust security, multi-sig wallets, and integration with existing financial apps provides a secure and compliant way to deliver digital banking, payment and related services in this new immersive digital medium

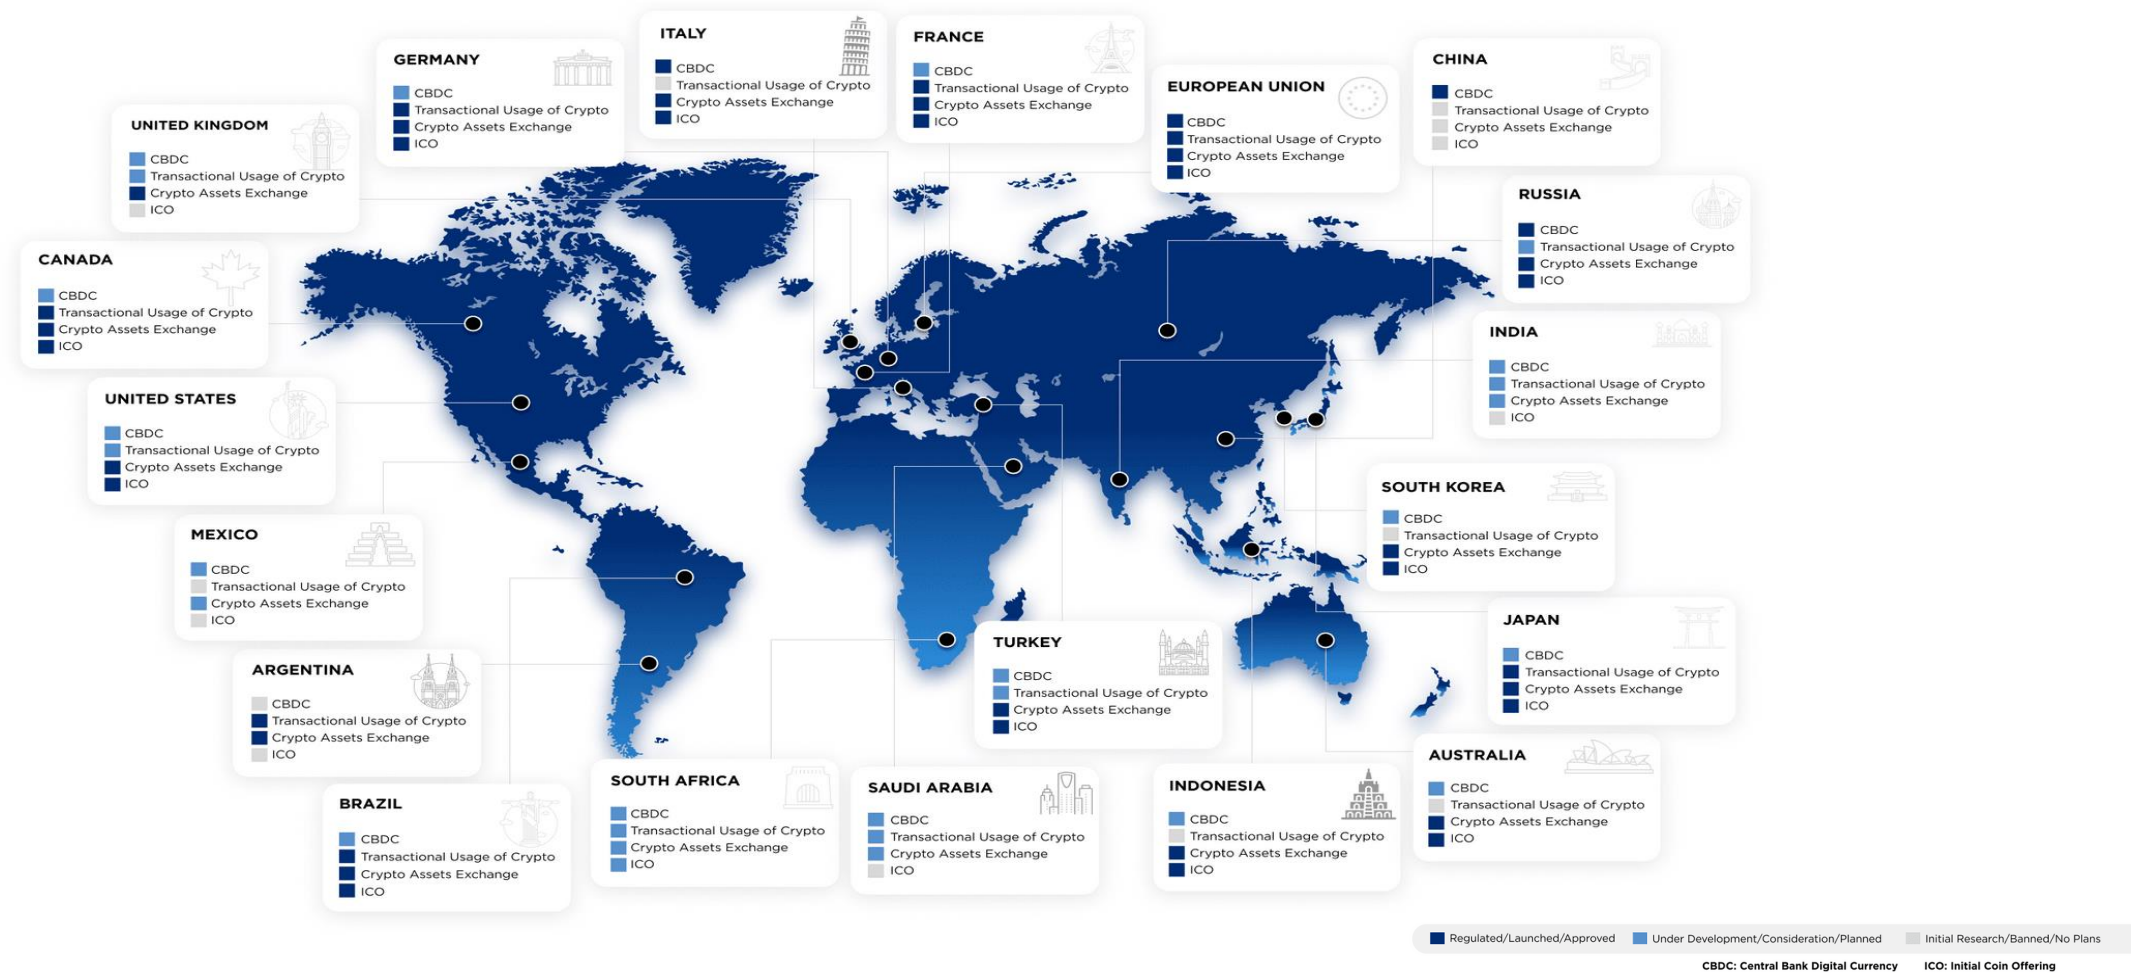

Our Web 3.0 Innovation Sandbox acts as a hub to explore new possibilities, forge alliances, and accelerate innovation as we build out the various elements of the platform

Select components

With a bouquet of tools and templates, we're able to quickly integrate applications, test a set of ideas, and capitalize on emerging opportunities

Our Goal is to partner with licensed institutions in multiple progressive jurisdictions to jointly design, structure, and offer novel financial products for the Metaverse era

[Blockchain Worx was part of a consortium and co-applicant for a Digital Banking license in Singapore]

We continue to establish strong relationships with global and regional organizations that are aligned with our vision of a Web 3.0 powered digital future

Folks we work closely with

We collaborate with some of the most reputed consulting firms, technology platforms and solution providers worldwide to ensure that we efficiently reach out and address the most critical areas of digital transformation

Join us as we forge alliances, lead this new digital paradigm and pave the future of finance in the Metaverse
